Douglas Creek Conservation District

What is the purpose of a Conservation District?

Since 1937, Conservation Districts have represented private landowners' interests in conservation planning and practices. While Conservation Districts are technically considered "local governments," they fall under the statutory guidance of the State. We are political subdivisions of the State of Colorado. The authorities, power and structure are contained in the Colorado Revised Statutes, Title 35, Article 70.

Mission:

To provide guidance and technical assistance to encourage and promote the wise use of natural resources within the district by private landowners and government land management agencies.

Board Members

Bill Hume, President
Terry Smalec, Vice President
Scott Robertson, Secretary-Treasurer
Ron Reich, Supervisor
Rosaly Coombs, Supervisor

Staff

Callie Hendrickson, Executive Director
Tristan Nielsen, District Manager

Operating Partnership

The Douglas Creek Conservation District (DCCD) and White River Conservation District (WRCD) work closely together and share operating costs of the Districts to be as effective and efficient as possible. Based on Mill levy income, the WRCD provides 90% of operating costs and DCCD provides 10%.

Where do the tax dollars go?

A **constituent driven** Long Range Plan of Work for the Douglas Creek Conservation District (DCCD)

Implementation of the **locally led Rio Blanco Land and Natural Resources Plan and Policies** which provides government to government communications with locally led input on federal land management.

Endangered Species, Excess Horses, Grazing, Water, Oil & Gas, Special Designations

Locally led conservation efforts

White River Algae Study, Integrated Water Management Planning process, Information and education on natural resource issues, Restoration and Monitoring project, Noxious weed control

★ ACCOMPLISHMENTS ★

Board Member Certification Colorado State Conservation Board (CSCB) recognized all five board members for completing the Board Member Certification course. Through extensive training, supervisors learned about history of the districts, the role of a supervisor, and how districts can best serve their landowners. Members received wool vests as recognition for their completion.

Excess "Wild" Horses Direct communication with local, state and national BLM leadership regarding impacts of excess horses and requesting removal of excess horses in Rio Blanco County.

White River Water Management Planning Process The Districts initiated a locally led process to determine if the Rio Blanco County community is interested and willing to engage in a water management planning process. The Districts developed a geographically balanced Planning Advisory Committee (PAC) consisting of 16 individuals representing ag., municipalities, industry, environment, recreation, and land/water right holders.

TAG Meeting

Approximately 30 local citizens were interviewed in preparation for a broader discussion in 2020.

White River Algae Study The Study continued for the second year of a three-year study to ascertain what is driving the algae growth in the White River to improve the overall health of the watershed. The 14-member Technical Advisory Group (TAG) continues to guide the study conducted by USGS that will be finalized in 2021.

District Conservation Technician (DCT) The DCT assisted over 30 different producers with projects such as: livestock water and irrigation, pipeline implementation, fire mitigation (post burn), soil samples, easement surveying, and NRCS programmatic compliance reviews.

Long Range Planning The District received input from approximately 40 landowners regarding their resource priorities. Specific priorities included rangeland health, water and wildlife. Landowners also requested the district continue to use and implement the Land and Natural Resource Plan and Policy during federal land management planning processes.

Restoration & Monitoring Project The Districts have a financial assistance agreement with the Bureau of Land Management (BLM) to focus on the development and implementation of a comprehensive range monitoring program and mapping and spraying of noxious weeds within the Piceance basin, primarily in the Piceance East Douglas Herd Management Area. The Districts contracted with Osborn Industries for data collection to help determine and verify what species are using the forage at what time of the year. Over 200,000 acres were included in the project.

WATER LAW IN A NUTSHELL

Nineteen landowners attended the seminar by former attorney Aaron Clay. It covered all aspects of the law related to water rights and ditch rights as applied in Colorado. Subject matter included information on the appropriation, perfection, use, limitations, attributes, abandonment and enforcement of various types of water rights.

Coordinated Resource Management Plan (CRMP) In partnership with BLM and other agencies the Districts initiated a CRMP program to achieve common goals and meet resource needs across ownership boundaries.

Rangely 6th graders participated in the annual poster contest. This year's theme: **Life in the Soil – Dig Deeper**

1st Halle Harris

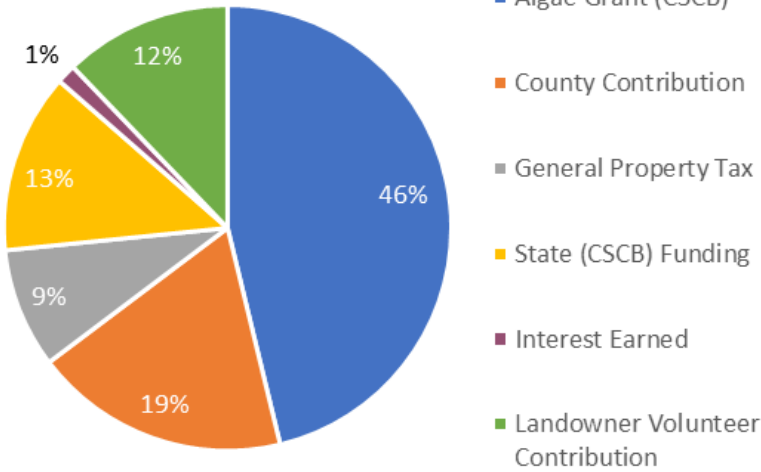

2nd Kaelyn Geer

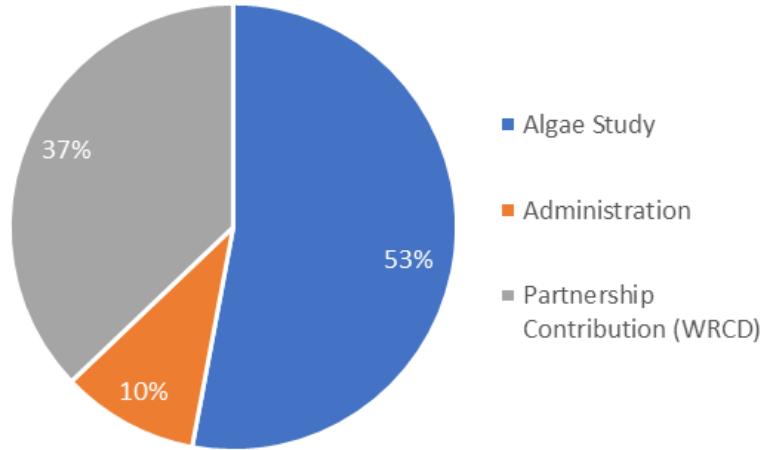

3rd Aren Robertson
